

The *Identity Management for .NET Advanced* Training is an advanced training class for those interested in learning detailed deployment methods for BMC® Identity Management for .NET software.

Description:

The BMC® Identity Management for .NET “Advanced” course is an extension of the “Essentials” course. This course focuses on advanced topics including: workflows, provisioning, application integration, customization, and extension of the product, as well as *Best Practice* discussions. Actual complex deployment scenarios will be used to demonstrate the subject matter. The course begins with a brief overview of key items learned in the first class and then quickly progresses into more advanced topics.

Who Should Attend:

This course is designed for customers of BMC that have purchased the BMC® Identity Management for .NET software and require an advanced knowledge of the product. In particular, it is vital for members of your IT staff & managers implementing or supporting the solution to attend.

Objectives:

After completing this course, a student should be able to understand:

- ✓ The BMC Federated Identity Manager architecture and features.
- ✓ The provisioning and MIIS integration provided by the BMC® Identity Management for .NET software.
- ✓ The workflow integration provided by Ultimus and the BMC® Identity Management for .NET software.
- ✓ Reverse proxy architectures and concepts.
- ✓ Best practices for deploying the BMC® Identity Management for .NET software.
- ✓ An understanding of the product Add-On’s available for the BMC® Identity Management for .NET software.

Prerequisites:

Course number BMC100 (Identity Management for .NET Essentials) is a prerequisite for attending this class. Exemptions to this prerequisite can only be made by the Optimal IdM trainer prior to the class commencing.

Timing:

This class can be taken at any time provided that course number BMC100 has been completed successfully.

Location:

This course can be held at your location, or in a training facility in Tampa, Florida.

Class Size:

Classes generally have between 10 and 15 students. The course contains extensive hands-on labs and therefore a class size greater than 15 students is not recommended.

Course Customization:

This course can be customized to meet the specific needs of your organization.

Cost:

Please contact education@Optimalidm.com for pricing information.

Optimal IdM represents the largest mindshare of BMC Identity Management implementation experience in the world. In fact, BMC Software selected Optimal IdM for the internal Identity Management deployment at BMC Software.
