

Optimal IdM Reports™ written for BMC® Identity Management for .NET

Extend the BMC® Identity Management for .NET Software

BMC®'s Identity Management for .NET software is the industry's leading Identity Management solution for the Microsoft .NET platform.

Optimal IdM Reports™ is an essential tool that seamlessly integrates within the BMC® framework to provide your organization a comprehensive suite of reports that leverages your existing BMC® audit database and LDAP directory.

Meet your compliance needs for both auditing and reporting

Optimal IdM Reports™ is a web reporting package that includes a complete set of audit & compliance reports, developed specifically for the BMC® Identity Management for .NET product using Microsoft .NET technology.

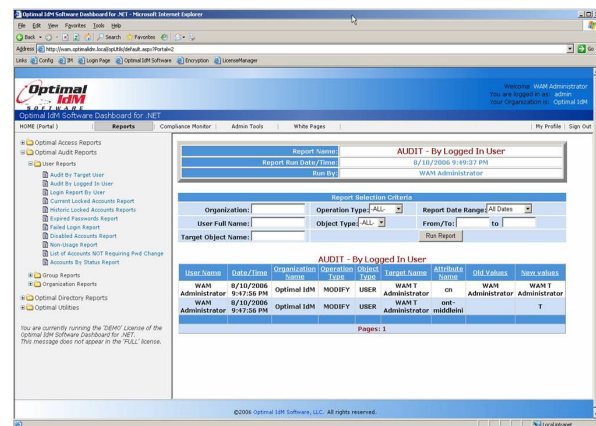

BMC®'s Identity Management for .NET software provides full audit and access logging capabilities to a SQL Server database. Optimal IdM Reports™ allows you to quickly and easily retrieve this information.

Optimal IdM Reports™ leverages this valuable audit and access database to provide you over 30 canned reports. These reports provide the compliance related answers you need, instantly without the need to write a custom report, query a database or parse an LDIF file.

Optimal IdM Reports™ allow you to quickly answer valuable questions such as:

- **Who has access to what?**
- **Who granted access and when?**
- **Who has never logged in?**
- **Who is currently locked out?**
- **What changes have been made to a user's profile and by who?**
- **Who are all of the members of a group (or have a role)?**

And many more...

Optimal IdM Reports™

written for BMC® Identity Management for .NET

Benefits

- **Puts valuable compliance information at your fingertips with real time** auditing reports (LDAP, and database).
- **Shows Administrators** if unauthorized access has been granted to applications.
- **Quickly & Easily** view who has access to what applications and who granted access.
- **Reduce costs by using a reporting framework** specifically written for your Identity Management and Access control infrastructure.
- **Aids in your company's efforts for compliance with governmental regulations such as** *Sarbanes Oxley (SOX), Basel II, European Union Privacy Directive, Capital Accord HIPAA and Gramm-Leach-Bliley Act.*

Features

- **Access to reports and the data displayed is controlled using BMC® roles and delegated administration**—Users only see the data they are authorized to access.
- **Over 20 Canned Reports** leveraging both the SQL audit database & LDAP directory.
- **.NET Architecture**—Application uses the same .NET architecture that BMC® Identity Management for .NET software uses.
- **Export/Import**— All reports can easily be exported to Word, Excel, XML, or PDF for easy distribution.
- **Reporting Framework**— New reports can easily be created to either LDAP or DB. No programming is needed. Only the SQL statement or LDAP filter.
- **Schedule/E-Mail**—Reports can be enhanced using **Optimal IdM Compliance Manager™** to easily save, schedule & email reports to users in an automated fashion.

Software Requirements

- Microsoft IIS Web Server 6.0
- Microsoft SQL Server 2005
- Microsoft .NET Framework 2.0
- BMC® Identity Management for .NET software including .NET API
- 100 MB of Hard Disk Storage

Pricing

The Optimal IdM Reports™ is a module within the Optimal IdM Dashboard™ and works in conjunction with the Optimal IdM Compliance Manager™.
