

Optimal IdM's FREE Microsoft IdM Workshop provides an introductory overview of the Microsoft identity management product suite. The workshop discusses key focus areas & products, best practices, as well as tips to a cost effective and successful identity management deployment.

<p>Description</p>	<p>Optimal IdM's IdM Workshop allows a company to quickly become knowledgeable in the field of identity management. It also exposes the organization to the entire Microsoft identity management product suite. The FREE workshop can be customized to meet your needs but typical subject areas include:</p> <p>Identity Management Overview – Details IdM space in general, including trends, technology and products available.</p> <p>Microsoft IDA Product Suite Overview – Discusses the Microsoft identity management product suite (IDA), including Forefront Identity Manager (FIM), Active Directory Federation Services (AD FS), and Active Directory (AD, AD LDS).</p> <p>Best Practices – Our worldwide recognized experts bring to you best practices for deploying Microsoft's identity management products. Learn exactly what you need to do and what you should avoid doing. Our proven best practices will save you time and money by avoiding the most common mistakes.</p> <p>Project Scoping – Project scoping is one of the most overlooked tasks in an IdM project. Using our AIM™ Methodology, we can show you how to approach project scoping both in terms of time as well as cost.</p> <p>Product Evaluation/Comparison – We implement multiple identity management products. Most products offer the same basic feature set, but knowing which product is the "right" solution for your project can be difficult. Our experienced consultants can provide you with un-biased suggestions about identifying IdM products that fit the requirements of your deployment.</p>
<p>Duration</p>	<p>1 Day Workshop</p>
<p>Cost</p>	<p>Please contact us at 813.425.6351, sales@optimalidm.com, or speak to your local Microsoft representative about this offering.</p>
