

**OAM Smart Start™ is a limited scope implementation of OAM that is focused on achieving a tactical business issue such as Single Sign-On (SSO), Password Management, Self-Service, Self-Registration, or Delegated Administration in an inexpensively priced packaged solution.**

<b>Description</b>	<p>OAM Smart Start™ is a program allowing customers to <b>rapidly achieve value</b> in their OAM software. In many cases, customers would like to achieve one of two fundamental goals:</p> <ol style="list-style-type: none"> <li>1. Solve an immediate tactical business problem such as reduce/eliminate help desk password re-sets, or provide Single Sign-On into applications.</li> <li>2. Stand up a pilot OAM implementation to gain knowledge and experience of how to deploy the product in an enterprise wide deployment.</li> </ol> <p>Using the OAM Smart Start™ program and the Optimal IdM AIM™ Methodology, we can rapidly deploy Oracle's OAM software to meet these focused business needs. The program is an easy to follow set of steps that guide a client through a deployment of OAM, providing a stable environment on which more functionality can be delivered.</p>
<b>Duration</b>	<p>Typically lasts 6-8 weeks but can be adjusted to suit your needs.</p>
<b>Cost</b>	<p>Please contact us at 813.425.6351, <a href="mailto:sales@optimalidm.com">sales@optimalidm.com</a>, or speak to your local Oracle representative about this offering.</p>
<b>Deliverables</b>	<ul style="list-style-type: none"> <li>• <b>Project Scoping &amp; Discovery</b> document detailing the project requirements.</li> <li>• <b>Project Schedule</b> outlining the milestone tasks in the project, including time and resource estimates.</li> <li>• <b>Technical Architecture Design Document</b> containing base infrastructure design, network diagrams, and OAM architecture design (Searchbases, AAC's, Workflows, etc.)</li> <li>• <b>Installation and configuration of the OAM system</b> including selecting and installing an LDAP directory, extending schema, installing and configuring the base Identity and Access system to meet the Smart Start™ initiative.</li> <li>• <b>Best Practice Knowledge Sharing</b> sessions allow your technical staff to become experienced consultants on the OAM solution. Our AIM™ methodology contains sessions covering all of the OAM implementation topics in an easy to follow format.</li> </ul>
<b>Benefits</b>	<ul style="list-style-type: none"> <li>• <b>Reduce costs</b> by providing self-service functions such as password re-sets self-registration, and consolidation of application SSO into one common method of authentication/authorization.</li> <li>• <b>Provide value quickly</b> to the business community by focusing on one tactical business problem and solving this in a rapid deployment (usually in 30 days or less).</li> <li>• <b>Quick win</b> –Gain the quick win that shows upper management in your corporation that you can be successful in your identity management initiative.</li> <li>• <b>Gain valuable Best Practices</b> from the most experienced OAM consultants who have been working with the product for years.</li> <li>• <b>Have a solid IdM infrastructure</b> which can be expanded to deliver increased functionality to the business community.</li> </ul>
