

**The *Virtual Identity Server Administration* training is a comprehensive hands-on class that covers all aspects of installing, configuring and maintaining your Virtual Identity Server deployment.**

## **Description:**

This **two day** course is designed for customers and partners of Optimal IdM that have purchased the Virtual Identity Server and are looking for administrator knowledge of the product. *This course is a suggested class for all clients prior to their project kick-off.*

The course covers the base installation and configuration of the software and an overview of the key product features. Real-world business scenarios are utilized throughout the training materials to help students understand how the software can be used to meet common business requirements. Additionally there are hands-on labs that students perform to gain real world experience.

## **Who Should Attend?**

This course is recommended for all customers of the Virtual Identity Server, as well as partners wanting to be proficient with the solution. In particular, it is vital for members of your IT staff implementing or supporting the solution, IT managers as well as key business analysts and representatives to attend.

## **Objectives:**

After completing this course, a student should be able to understand:

- ✓ The architecture and features of the Virtual Identity Server and its components.
- ✓ How to install and configure the Virtual Identity Server.
- ✓ Common deployment items such as High Availability/Failover, tuning, caching, etc.
- ✓ How the Virtual Identity Server solves common business problems.

## **Prerequisites:**

A general understanding of Identity Management and LDAP technologies is recommended.

## **Course Materials:**

The course is a mix of PowerPoint, plus labs that are delivered via Microsoft Virtual PC (32 bit). Customers should have a laptop with at least 1GB of RAM (2GB or more recommended).

## **Timing:**

The ideal time for attending this session is prior to the kick-off your project.

## **Location:**

This course can be held at your location, or in a training facility in Tampa, Florida.

## **Class Size:**

The course contains hands-on labs and therefore a class size of no more than 15 students is recommended.

## **Course Customization:**

This course can be customized to meet the specific needs of your organization.

## **Cost:**
